TRANSPLANTED APPLE TREES

For several years we have been transplanting two or three year old apple trees and growing them into larger sizes. This transplanting makes the trees just as safe to move as a properly grown shade tree.

PRICES

5 and 6 year transplanted apple trees

Cortland. Very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree petter and well worth planting.

†*Duchess. Striped red. Early August. Following Red Astrachan.

°†*Fall Pippin. Well known Fall variety. Transplanted trees only.

†*Gravenstein. Large, striped, red. August and September.

†*Early McIntosh. A cross between McIntosh and Yellow Transparent. Fruit is very similar to McIntosh in appearance, ripening about two weeks after Yellow Transparent.

best red strain of Rome Beauty. An early and annual bearer of late winter apples which retain a bright, shiny appearance until spring.

†*Red Gravenstein. (Washington Strain) Originated in the state of Washington and is said to be the best red strain of Gravenstein. The fruit is similar to Gravenstein but a darker red and very little stripe.

†*Lodi. This is an introduction of the New York Fruit Testing Association at Geneva. The fruit has the same color as Yellow Transparent, ripens at the

McIntosh. Known by all Season of picking middle of September. Our trees both I year and 2 year have been budded from especially selected red

/°†*Milton. Of McIntosh type, ripening two to three weeks before McIntosh. The fruits are covered with a pinkish red and is a most attractive

variety. Flesh is white, tender, crisp, juicy and of McIntosh flavor and aroma.

†*Rome Beauty. A large, red striped, annual bearing, very late Winter

†*Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

†*Stayman Winesap. Standard winter apple in New Jersey. A good variety for late winter in some sections of New England. Large, red apple.

/°†*Wagener. Great filler variety. Bears young. Red, early winter.

†*Opalescent. Very large, red apple. Fall. Transplanted trees only

*Northern Spy. Well known early winter, red variety.

*Red Astrachan. Best, early red apple. August 1st.

+*R. I. Greening. Fine dessert variety. Early winter.

Roxbury Russet. Very late winter russet apple.

Red Rome Beauty. See Gallia Beauty.

†*Kendall. A handsomely colored dark red apple of McIntosh season.

†*Macoun. A dark red variety very similar to McIntosh in appearance. The flesh is especially snappy and juicy and is one of the finest quality varieties

†*Melba. One of the newer varieties. Similar to Duchess in season and

*Red Strain Delicious. A bright red strain, colors early and considered

Gallia Beauty (Red Rome Beauty). Generally considered to be the

°†*Baldwin. Large red winter apple. Known by all.

STATEMENT OF INSPECTION

Amherst, Mass September 18, 1939

TO WHOM IT MAY CONCERN:

This is to state that all the saleable apple, pear and plum stock now growing in the Wallingford Nursreies of the Barnes Nursery and Orchard Company near Wallingford, Connecticut, have been examined by me and, as they now stand in the nursery row all trees are, to the best of my knowledge and belief, true to name.

> J. K. Shaw, Research Professor of Pomology

NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind (such as 5 peach) at the 10 rate, 50

DISCOUNT

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1-year apple. Height is only approximate.

STANDARD APPLE TREES ORDER EARLY

Permanent apple trees are usually planted about 40 feet apart. Some growers prefer more, some a little less. Some also use fillers, such as peach trees, or early bearing varieties of apples, making them 20 feet apart, or if planted only in the center of the 40-foot space the distance will be 28 feet. As the trees begin to crowd, taking out one-half will leave them 28 feet apart and later when the remaining fillers are removed, the distance will be 40 feet. Thus an income can be had for many years, when the permanent trees will need only a portion of the land. trees will need only a portion of the land.

Two years old 16 in. and up Apple Trees

LESSONS

Each year we learn something from the previous growing and marketing season. Surely, the marketing season from Fall 1939 on has taught us lessons. Among others, that old trees which must be picked from ladders 25 feet or more in length are not practical. It is nearly impossible to spray them thoroughly, and the labor expense of thinning and harvesting is too heavy especially since these old timers rarely produce the best quality fruit.

Competition at present is such that one must have high quality fruit which is best and cheapest obtained from young trees. Further, many of the old time varieties can no longer be sold. For home use they may be fine, but for marketing purposes of no use.

Prices of fruit trees are the lowest they have been in years. In fact so low there is no object for a nursery to grow them. Surely advantage should be taken of present conditions to rip out the old non-profitable varieties and replace them with young and more desirable ones.

We are selling only apple trees of our own growing and every tree offered by us has had Dr. Shaw's inspection for trueness to name.

North Billerica, Mass., April 15, 1939

I just received the 50 McIntosh trees and they were first class.

†*Wealthy. Fine filler variety. Often bearing fruit in the nursery at two Yellow Delicious. Handsome, fine flavored yellow winter variety. †*Hyslop Crab. Very productive. Red.

PEACH TREES For several years, peach trees have been very lightly planted in the North Eastern United States. The hurricane of 1938 ruined fully one half of those in production. The result, less orchards, less production and higher prices. This statement was amply proven in the Fall of 1939. Prices were good and what orchardist could not have sold more than he grew. The evolution of peach varieties has been more marked than with any other kind of fruit. Many standard varieties of ten years ago are not used today. We have tried to keep abreast of the times and as new varieties of merit have appeared, we have adopted them.

TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Greensboro. August 1st. Medium size. White flesh. Very productive. Mikado. (June Elberta) August 1st. A very handsome roundish variety. Yellow flesh-excellent quality.

Marigold. August 8th. Yellow, semi-free, ripening at a time which is very desirable, filling a season where there has usually been a slight break.

Carman. August 15th. Medium to large. White. Very hardy variety. Cumberland. August 15th. Practically free, white flesh, dark red coloring, elongated in shape, good size. Best white of its season.

Golden Jubilee. One of the outstanding introductions of the New Jersey Experiment Station. A block laden with rich golden yellow, red blushed fruit is a handsome sight. Similar to Elberta in general appearance, but a brighter golden yellow, slightly smaller size and much better flavor.

Vedetta. A beautiful, large, yellow peach of Canadian origin following immediately after Golden Jubilee

Eclipse. August 25th. Medium size, yellow freestone, red eheek.

Hale Haven. This variety originated at the Michigan Experiment Station as a cross between South Haven and J. H. Hale. It is an improved South Haven, having large size, high color, excellent flavor and is very hardy. Don't fail to plant Hale Haven.

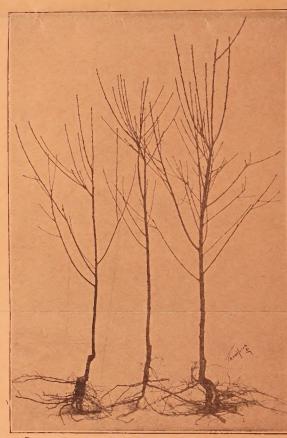

Belle of Georgia. September 1st. Probably the best known and most popular of white varieties.

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. The tree is not a very strong grower, but the fruit of well grown J. H. Hale are immense, handsome and of excellent

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise

Peach Special No. 1. This variety originated as a chance seedling. It is a yellow freestone of the Elberta type and follows immediately after

Comparative sizes of our 18, 18 and 18 in. Peach Trees.

Milford, Mass., April 25, 1030

We want to thank you for the trees we received. They were all in perfect condition

The nursery stock arrived in excellent condition. All planted and looks very fine.

CULTIVATED BLUEBERRIES

Blueberries grow in large clusters, plump, tender, and nearly seedless. They not only can be grown in the home garden, but are now grown commercially in large quantities and always command premium prices.

An acid soil is required, moderate moisture, and good drainage. A mixture of peat moss with sand in the regular soil will often be an advantage. They require cross pollenization, so more than one variety should be planted.

PRICES

Pink Radiance. Carmine pink, yellow at base of petals.

President Herbert Hoover. Maroon, orange and gold, long pointed buds, rigid stems and continuous bloomer.

rambler, but plant dwarf.

Red Radiance. Dazzling, crimson scarlet.

Talisman. Orange red, golden yellow and copper red. Red Baby Rambler. A very free bloomer with blooms similar to crimson

EVERGREENS

We have a large assortment of varieties and sizes of evergreens, but as our past experience shows that buyers prefer to see this class of stock, we shall not attempt to list them, but in the spring we shall be glad to have our customers call and make their own selections.

TESTIMONIALS

Worcester, Mass., April 28, 1939 Gentlemen: You were most generous in your count, also with the Greensboro peach tree as a premium. I must say that the plants are the finest I have ever received from any nursery. Thank you.

Marlboro, Mass., April 28, 1938

I received by trees in excellent condition. They were good, sturdy trees and had fine roots.

Pawtucket, R. I., March 1, 1938

You may recall that I purchased quite a bit of stock from you last spring and will be interested to know that all of the fruit trees and the asparagus seem to be thriving nicely.

Springfield, Vt., December 29, 1937

Very well satisfied with last year's Cortland whips.

Wampum, Penna., Jan. 13, 1938 Last year we bought some nursery stock from you. It was the best we'd been able to get yet. We had no trouble getting it all to grow.
